

query-perf

Tool for profiling ES query performance. Based on real correlation id queries. Evaluates the same queries against ES5 and ES7 for comparison.

Configuration

Set up environment variables pointing to the elasticsearch clusters including credentials:

```
export ELASTICSEARCH_URL_ES5=...  
export ELASTICSEARCH_URL_ES7=...
```

Run

```
bundle exec ruby run.rb  
bundle exec ruby run.rb --window 1 --correlation-ids 1 --correlation-query 'pubsub-rails-in'
```
