

Alerts

This is a small self-contained libsonnet library for processing alerts for GitLab's monitoring stack.

When generating alerts from jsonnet, pass the alert through this module to ensure that GitLab's alerting conventions are followed.

```
processAlertRule({  
  alert: 'AlertOnThingsDown',  
  expr: |||  
    up < 0  
  |||  
})
```
